

PTC Creo 2.0 Hardware Support – Dell

Last updated: August 8, 2018

The [Desktop Virtualization Environment Support – Dell](#) table displays at the end of this document, after the standard Creo certification table.

All drivers listed in this document are available from your workstation manufacturer. Do not attempt to search AMD(ATI) or NVIDIA websites as those hardware vendors often will only have current (latest) drivers available which in most cases HAVE NOT BEEN TESTED by PTC.

PTC recommends customers planning on upgrading to Creo 3.0 should consider moving to 64 Bit hardware as 32-bit platforms will not allow you to experience the best Creo performance and may not be supported on future versions of Creo.

Machine	O/S	Graphics Hardware	Driver Version	Date Certified or Supported	Minimum Supported Datecode	Status
Precision R5500	Windows 7 32 and 64 Bit	NVIDIA Quadro FX1800	8.15.11.9038	23-Jan-2010	C000	Supported N+2

NOTES

The latest graphics driver from AMD (15.301.2601.1004) has been found to resolve several random Creo exits. You should install this driver version if you are experiencing this exit condition.

Notes								
1. Please use only the VMware ESXi packages provided by the hardware vendor.								
2. 4 GPUs Maximum								

Client Configuration

PTC has tested the above virtualized desktop environments with Windows 7 and Windows 8 desktops and laptops. Please consult your virtualization technology provider on the recommendations for the client hardware.

**New certifications for Dell workstations are currently in progress.
Please check back later for further updates.**
