Creo Elements/Direct Modeling Data Management with Windchill PDMLink 10.0

Overview

Course Code: SAB-CT-2541
Course Length: 2 hours

This course constitutes a comprehensive review of Windchill Direct Modeling data management functionality. After completing this course, you will be prepared to complete basic Windchill CAD data management tasks and activities, as well as having a better understanding of Windchill CAD data management processes. In this course, you will learn key capabilities and features of Windchill CAD Data Management and how to use Windchill to manage Creo Elements/Direct Modeling design information. Specifically, you will focus on the day-to-day data management tasks required by the user community, including how to use the CAD data structure to associate and build the product structure. You will also learn how to use Windchill to perform basic PDM functions on Creo Elements/Direct Modeling CAD documents and their associated product structure objects.

Course Objectives

- Locating information
- Viewing information
- Creating new designs and sharing design information
- Modifying and managing existing design information

Prerequisites

- WBT-3020-0 Locate and View Information with Windchill 10.0 or equivalent
- Working knowledge of Creo/Elements Direct

Audience

- This course is intended for end users and System Administrators
