Overview

Course Code: SAB-CEK3043
Course Length: 1.5 Hours

This course constitutes a comprehensive review of product structure management functionality. In addition, the content is built to support topic-based course configurations. In this course, you will learn some of the concepts and terms that surround products and product structures. You will learn how to create product structures using part-centric and CAD-centric approaches. You will create baselines and new view versions of product structures. Finally, you will create bill of materials (BOM) notes to facilitate manufacturing.

Course Objectives

• Identify the role of parts, end items, and documents in product structures.
• Identify various approaches used to create product structures.
• Build and edit product structures.
• Add bill of materials (BOM) notes to product structures.
• Compare product structures.
Prerequisites

• WBT-3040-0 Locate and View Information with Windchill ProjectLink 10.0

Audience

• This course is intended for any user that needs to create or manage Windchill parts or product structures.
