After completing this course, you will be well prepared to set up and manage a basic Pro/INTRALINK implementation at your company.

In this course, you will learn how to perform basic Pro/INTRALINK administration tasks. You will learn how to plan and create user accounts and groups, and how to plan and create information management storage strategies. Other topics will include life cycles, contexts, teams, and configuring domain policies. These skills enable a business administrator to configure Pro/INTRALINK to meet business needs.

At the end of each module, you will complete a skills assessment. The questions are used to help reinforce your understanding of the module topics and form the basis for review of any topics, if necessary.

Course Objectives

- Understand the processes involved in defining your business environment
- Identify the use of a Windchill Organization
- Create and manage user accounts and groups
- Identify best practices for managing groups and user accounts
- Identify contexts and their relationships
- Assign product and library creators
- Create and manage product and library contexts
- Identify Windchill object names and their corresponding object type class names
- Create Global Attributes
- Add attributes to a Windchill Type
- Create a Windchill Type
- Identify and set object initialization rules
- Implement custom versioning sequences
- Create and define life cycle and workflow templates
- Associate life cycle and workflow templates
- Understand the Windchill domain policy architecture
- Define access control policies
- Identify individual access control permissions
- Administer and troubleshoot access control lists
- Define notification policies
- Define indexing policies
- Use Context Teams to apply access control
- Use Context Teams and team templates to conduct workflow role resolution
- Create and manage document templates within product, library, and organization contexts
- Identify how to create CAD document templates
- Create product and library context templates
- Create, manage, and edit promotion preferences
- Identify the promotion review and approval processes
- Use ModelCHECK validation during check in
- Administer administrator-saved searches
- Administer user profiles
- Administer calendar functions
- Administer organization preferences
- Identify the report manager functions
- Identify visualization publishing controls
- Identify purge manager functions
- Audit system events
Prerequisites

• Any one of the following courses or their respective WBT equivalents:
  • TRN-3145 Introduction to Pro/INTRALINK 10.0 for Light Users
  • TRN-3146 Introduction to Pro/INTRALINK 10.0 for Heavy Users
  • TRN-3147 Introduction to Pro/INTRALINK 10.0 for the Implementation Team

Audience

• This course is intended for business administrators, system administrators, and project team leaders. Implementation team members, including user adoption team members and those with general Pro/INTRALINK administration responsibilities, will also benefit from taking this course.
