Managing Materials with FlexPLM 10.1

Overview

Course Code  | WBT-3652-0
Course Length | 1 hour

In this course, you will learn how to manage materials used for product development in the Material Library. You learn how to associate suppliers, add colors, and compare materials. You also learn how to find where materials are used on product bills of materials. After completing this course, you will be able to manage material development information. You will complete Pro/FICIENCY skills assessment questions for each topic. These questions are used to help reinforce your understanding of the course topics.

Course Objectives

- Create and manage materials to be used for product development in FlexPLM
- Understand material associations to suppliers, colors, and documents
- Associate suppliers and manage supplier-specific material data
- Create material color development samples

Prerequisites

- Basic browser and Web navigation skills
- Basic understanding of Product Lifecycle Management processes and deliverables as they relate to seasonal product development

Audience

- This course is intended for production staff and system support staff. People in related roles will also benefit from taking this course.
