Creating and Managing Products with FlexPLM 10.1

Overview

Course Code  WBT-3656-0
Course Length  3 hours

In this course, you will learn how products and colorways are characterized in FlexPLM. You will learn how to browse product pages and how to create products in the FlexPLM Library. You will also learn how to add products to seasons. You will gain a high level understanding of product-season and colorway-season attribute definitions. You will learn how to work with the Line Sheet as a viewing tool, and as a tool to edit product development data. After completing this course, you will be prepared to create and manage products and colorways in FlexPLM. You will complete Pro/FICIENCY skills assessment questions for each topic. These questions are used to help reinforce your understanding of the course topics.

Course Objectives

• Understand how products and colorways are characterized in FlexPLM
• Understand how seasonal products and colorways are defined in FlexPLM
• Create and manage products, placeholders, and colorways
• Use the Line Sheet as a tool to present and view products and colorways
• Create Line Sheet views and work with Line Sheet options
• Use the Line Sheet Editor as a tool to manage product development data

Prerequisites

• Basic browser and Web navigation skills
• Basic understanding of Product Lifecycle Management processes and deliverables as they relate to seasonal product development

Audience

• This course is intended for production staff and system support staff. People in related roles will also benefit from taking this course.
