Working with Product Specifications and their Components in FlexPLM 10.1

Overview

Course Code  WBT-3658-0
Course Length  3 hours

In this course, you will learn how to manage product specifications. You will also learn how to create specification components such as measurements, construction sets, images, and bills of materials (BOM). You will gain a high level understanding of specification associations to seasons, sources, colorways, and size definitions. You will also learn how to create product specifications, add components, and generate Tech Packs. After completing this course, you will be able to manage specifications and their components in FlexPLM.

You will complete Pro/FCIENCY skills assessment questions for each topic. These questions are used to help reinforce your understanding of the course topics.
