</table>

In this course, you will gain an understanding of basic Windchill ProjectLink administration tasks. You will learn how to plan and create user accounts and groups, and plan and create information management storage strategies. Other topics will include life cycles, workflows, teams, and configuring domain policies. These skills are important because they enable a business administrator to configure Windchill ProjectLink to meet business needs. After completing this course, you will be well prepared to set up and manage a basic Windchill ProjectLink implementation at your company, and you will complete Pro/FICIENCY skills assessment questions for each topic. These questions are used to help reinforce your understanding of the course topics.

Course Objectives

- Understand the processes involved in defining your business environment
- Identify the use of a Windchill Organization
