Overview

In this course, you will gain an understanding of the end user enhancements introduced in Servigistics Parts Management version 10.7. These enhancements include new fill rate options, a new Inventory Position tab on the Planner Worksheet page containing information for pairs using trigger-point planning, and a new Order Process Sequence Parameter that enables you to specify the sequence of order planning sub-processes.

Course Objectives

- Describe the new fill rate options
- Describe the new Inventory Position tab on the Planner Worksheet page
- Describe the new Order Process Sequence Parameter
Prerequisites

- Introduction to Servigistics Parts Management 10.6

Audience

- This course is intended for individuals who need to use Servigistics Parts Management to view information, perform user tasks, or use product information when making business decisions. People in related roles will also benefit from taking this course.
