Update to Creo Elements/Direct 18.1 from Creo Elements/Direct 17.0

Overview

Course Code | WBT-3941-T
Course Length | 8 Hours

In this course, you will learn about user interface changes, including the improvements to modeling commands and improvements to the Sheet Metal module. This course is intended to introduce and feature new functions and updates to Creo Elements/Direct Modeling 18.1.

At the end of each module, you will complete a set of review questions to reinforce critical topics from that module. At the end of the course, you will complete a course assessment in Pro/ENGINEER intended to evaluate your understanding of the course as a whole.

Course Objectives

- Learn the updated user interface
- Understand new 2-D commands
- Understand enhancements to modification commands
- Learn the new Sheet Metal functions
- Understand updates to data import and export options

Prerequisites

- Must have prior experience with Creo Elements/Direct Modeling
- Sheet Metal module experience is not required, but highly encouraged

Audience

- This course is intended for designers, mechanical engineers, industrial designers, and tooling designers. People in related roles will also benefit from taking this course.
