Introduction to Windchill Prediction, FMEA, RBD and FTA 10.2

Overview

Course Code: WBT-4290-0
Course Length: 24 Hours

In this course, you will be introduced to PTC Windchill Quality Solutions 10.2, enabling you to quickly maximize your investment. You will have an overview of software features and functionality. You will work on sample projects that are based on real-world scenarios. You will learn about some of the key features such as data entry, data analysis and data output for PTC Windchill Prediction 10.2, PTC Windchill FMEA 10.2, PTC Windchill, RBD 10.2, and PTC Windchill FTA 10.2. You will also learn about various features common to the various PTC Windchill Quality Solutions 10.2 modules, including importing, graphing, and reporting.

Prerequisites

- Basic skills and understanding of the use of software programs in a Windows® environment.

Audience

This course is intended for any PTC Windchill Quality Solutions 10.2 user to help maximize the PTC Windchill Quality Solutions 10.2 investment, specifically PTC Windchill Prediction 10.2, PTC Windchill FMEA 10.2, PTC Windchill RBD 10.2 and PTC Windchill FTA 10.2.

Topics

- Provide introductory information about PTC Windchill Quality Solutions 10.2
- Introduce key features of PTC Windchill Prediction 10.2, including those for data entry, data analysis, and data output, plus additional features
- Practice using PTC Windchill Prediction 10.2
- Introduce key features of PTC Windchill Quality Solutions 10.2 that are common to multiple modules
- Practice using PTC Windchill Quality Solutions 10.2 Common Features
- Introduce key features of PTC Windchill FMEA 10.2, including those for data entry, data analysis, and data output, plus additional features
- Practice using PTC Windchill FMEA 10.2
- Introduce key features of PTC Windchill RBD 10.2 for block diagram analysis, including those for data entry, data analysis, and data output, plus additional features
- Practice using PTC Windchill RBD 10.2
- Introduce key features of PTC Windchill FTA 10.2, including those for data entry, data analysis, and data output, plus additional features
- Practice using PTC Windchill FTA 10.2
