Business Administration of PTC Windchill FlexPLM 10.2

Overview

Course Code: WBT-4381-0
Course Length: 16 Hours

In this course, you will learn how to configure PTC Windchill FlexPLM to support Retail, Footwear, and Apparel business entities. You will gain an understanding of the tools and methodologies used to create a framework for business objects. You will learn how to use the FlexPLM Type Manager to types and attributes. You will also learn about the different attribute types available in FlexPLM and how to configure them. You will learn how to create and manage access control policies. Finally, you will learn how to automate business processes using life cycles, workflows, and teams.

At the end of each module, you will complete a set of review questions to reinforce critical topics from that module. At the end of the course, you will complete a course assessment in Pro/FICIENCY intended to evaluate your understanding of the course as a whole.

Course Objectives

- Identify the Windchill system architecture.
- Identify the role and responsibilities of the FlexPLM business administrator.
- Access and manage types in the Type Manager.
- Extend objects types and create subtypes.
