Overview

Course Code: WBT-4402-0
Course Length: 3.5 Hours

In this course, you will receive a comprehensive review of the Creo View Lite 3.0 functionality. The content is built to support topic-based course configurations. You will learn about Creo View Lite and its role as a visualization solution for Product Data Management systems. You will also learn how to visualize products and navigate through or query 3-D models, 2-D drawings, images, and documents. Additionally, you will learn how to deconstruct models to view how components fit together. Finally, you will learn how to create markups and save annotation sets to communicate design ideas and problems.

You will complete Pro/FICIENCY skills assessment questions for each topic. These questions are used to help reinforce your understanding of the course topics.

Course Objectives

- Understand visualization
- Navigate the Creo View Lite user interface
- Navigate and orient 3-D models
- Find and select model components
- Change model appearances
- Work with model annotations
- Explode model components
- Section models
- Work with components and groups
- View 2-D drawings, images, and documents
- Create markups and annotation sets
- Take measurements

Prerequisites

- Locate and View Information with Windchill Service Information Manager 10.2

Audience

- This course is intended for any user who needs to view and manipulate product information residing within the Windchill Service Information Manager system.
