Overview

In this course, you will learn basic operations for authoring content. You will learn about information elements, how they are created, and how you use Arbortext Editor to modify textual information element content.

At the end of each module, you will complete a set of review questions to reinforce critical topics from that module. At the end of the course, you will complete a course assessment in Pro/FICIENCY intended to evaluate your understanding of the course as a whole.

Course Objectives

- Understand the process used to author content.
- Define and use different types of information elements.
- Identify the different information element objects.
- Assign existing item choices.
- Add content to groups.
- Use related applications to add information structure content.
Prerequisites

- WBT-4450–A The Windchill Service Information Manager 10.2 Service and Parts Information Process

Audience

- This course is intended for anyone who will be creating, managing, and using Arbortext Editor and Windchill Service Information Manager. Anyone evaluating Arbortext Editor and Windchill Service Information Manager will also benefit from this course.
