In this course, you explore the overall Release and Deliver process. This includes investigating configuration processes, and using the Task Manager to add collections. You also use the Task Manager to add service information to InService. You learn about different troubleshooting procedures. You review the release and deliver best practice, and its sub-steps. You also explore InService and its user interface.

This course has been developed using InService 6.4 F000.

Course Objectives

- Understand the InService overall process.
- Execute tasks using the Task Manager.
- Explore various InService configuration files.
- Add collections to InService.
- Perform Transform and Load tasks.
- Enable notifications.
- Identify various bundle files.
- Monitor and schedule tasks.
- Troubleshoot InService.
- Understand navigating, searching, and filtering service information using InService.
