In this course, you learn about the Windchill Nonconformance Management best practice quality process. This enables you to capture and process all types of internal, product, material, and process nonconformances. You will learn how to create, evaluate, and investigate a nonconformance intake and also learn how to create, review, and finalize a disposition plan.

Course Objectives

- Create nonconformance intake
- Evaluate nonconformance intake
- Investigate nonconformance intake
- Create nonconformance disposition plan
- Review nonconformance material board
- Finalize Nonconformance disposition
