The PTC FlexPLM 11.0 Line Management Process

Overview

Course Code: WBT-4765-G
Course Length: 3 Hours

In this course, you will learn about the Line Management Process in FlexPLM. You will learn how to build a product line by creating new products, and by using existing product candidates and carryover products from previous seasons. You will also learn how to review and refine a product line, how to adopt product candidates, and how to create colorways.
