In this course, you will gain an understanding of basic Windchill ProjectLink administration tasks. Other topics will include basic life cycles, teams, and configuring domain policies. These skills are important because they enable a business administrator to configure Windchill ProjectLink to meet business needs. After completing this course, you will be well prepared to set up and manage a basic Windchill ProjectLink implementation at your company.

At the end of each module, you will complete a set of review questions to reinforce critical topics from that module. At the end of the course, you will complete a course assessment in PTC University Proficiency intended to evaluate your understanding of the course as a whole.

This course has been developed using Windchill 11.0 F000.

Course Objectives

- Edit and view life cycle template properties.
- Define the transitions.
- Understand the transitions in ProjectLink.
- Map participants to context Teams.
- Team creation in Windchill ProjectLink.
