In this course, you will learn how to effectively administer the ThingWorx Navigate business environment. You will learn about the functionality included in ThingWorx Navigate. You learn how to configure miscellaneous options that are available in the task tailoring pages. Finally, you will learn how to configure various types of task filters to refine your search results.

You will complete PTC University Proficiency skills assessment questions for each topic. These questions are used to help reinforce your understanding of the course topics.

This course has been developed using Windchill 11.1 M010 and ThingWorx Navigate 1.8.
