Integrations with Integrity 11

Overview

In this course, you will be introduced to the capabilities and concepts of integrations. Microsoft Excel, Microsoft Word, and Windchill integrations will be covered.

PTC has introduced a new app-based interface for the ALM-PLM interpretability feature using PTC Navigate. In this course, you will be introduced to two new apps: View Requirements and Manage Traces Apps, you will get a preview of these two apps, and you will receive new feature introductory information.

You will complete PTC University Proficiency skills assessment questions for each topic. These questions are used to help reinforce your understanding of the course topics.

This course has been developed using Integrity 11 F000.
