Update to Creo Parametric from Creo Elements/Pro 5.0

Overview

Course Code  WBT-3400
Course Length  8 Hours

In this course, you will learn how to utilize the core functionality enhancements in Creo Parametric 1.0. First, you will become familiar with using and customizing the new ribbon interface in Creo Parametric. Next, you will become familiar with the Sketcher workflow and reference enhancements. Part modeling enhancements to features such as Extrude, Corner Chamfer, Sweeps, and Datum Curves will then be examined. You will also learn about new and enhanced Assembly capabilities, such as selecting multiple components, the new relationship constraints, and enhancements for dragging components. Next, you will examine the new Table and Balloon functionality for 2-D drawings, and review various detailing enhancements. Finally, in Sheetmetal mode, you will learn to use the many updated tools such as Wall, Bend, and Relief, as well as the consolidated Flat Pattern tool and configuring Sheetmetal properties.

At the end of each module, you will complete a skills assessment. The questions are used to help reinforce your understanding of the module topics and form the basis for review of any topics, if necessary.

Course Objectives

- Utilize the Interface enhancements in Creo Parametric
- Utilize the Sketcher enhancements in Creo Parametric
- Utilize the Modeling enhancements in Creo Parametric
- Utilize the Assembly enhancements in Creo Parametric
- Utilize the Drawing enhancements in Creo Parametric
- Utilize the Sheetmetal enhancements in Creo Parametric
Prerequisites

- Introduction to Pro/ENGINEER Wildfire 5.0, or equivalent experience with Pro/ENGINEER Wildfire 5.0 or Creo Elements/Pro 5.0.

Audience

- This course is intended for design engineers, mechanical designers, and industrial designers
- People in related roles can also benefit from taking this course
